Project
Data Analytics Hackathon

Real Projects Partner
OutLearn platform, Embassy of Netherlands

Student
Filip Mladenovski

To whom it may concern,

I'd like to recommend the team that exceptionally stood out at the Outlearn Data Analytics Hackathon for their clear thinking, refined design, and strong analytical approach.

Their solution featured intuitive navigation, clean vertical layout, and impactful visuals—especially on the Students Overview page, which smartly grouped performance levels and interest data. Interactive elements like maps, tooltips, and bookmarks added depth to the experience.

They demonstrated great attention to detail by marking added data columns, applying consistent naming, and using logical groupings like age and school year. Their inclusion of growth rate metrics showed solid analytical thinking and awareness of real-world use cases.

In just 2.5 days, they delivered a polished, functional, and well-structured report. A clear 10/10 effort.

Sincerely,

Vlatko Tuchev
Mentor

The student's experience working on this real client project highlights their practical skills and readiness for future professional challenges. It demonstrates their ability to apply their knowledge effectively and adapt to real-world scenarios.
